The main goal of this project is to visualize the AIRBNB company's data in order to gain a better insight into the data and the price movement of the NYC neighborhoods.

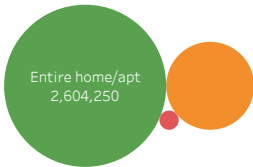

Airbnb, Inc. is an American San Francisco-based company operating an online marketplace for short-term homestays and experiences.

AirBNB NY

Challenges

There were not many challenges in this project. If I'm going to name something as a challenge, it would be to set the option by selecting the street view display on the map.

Future Goals

If I had more time, I would like to find more recent data so that I could work with the real data of the current market
